

Independent learning tasks in Geography

<p>Check the BBC News website for breaking news for your topics (coasts, tectonics, changing places and deindustrialisation, carbon and water cycles, ocean governance, climate change, social and economic factors impacting development in Sub-Saharan Africa) once a week or fortnight. Print off stories that link to specific areas of the course, read and annotate them, and add to your file at the relevant point.</p>	
<p>Check Twitter including PHS_Geography twitter feed, look for interesting articles which relate to your topics (including skills and fieldwork). Read and make notes from these, where possible draw diagrams and add them to your file at the relevant points.</p>	
<p>Look at the skills section of the Geography Specification on the WJEC GCE site. Check that you know and can apply all skills that are outlined (fieldwork, data presentation and statistical analysis). Watch Youtube tutorials to show how to apply the technique, make notes and sketches and add to your file.</p>	
<p>Create a scrapbook of newspaper articles. Annotate them to highlight links to the course.</p>	
<p>Look for topical documentaries; geography is an evolving subject. Watch documentaries on plastic pollution, people trafficking, climate change causes and effects, volcanic eruption / earthquake causes and effects etc. to develop your depth of understanding.</p>
